Profile

Master's graduate in Data Science and Bachelor's degree in Business Intelligence, currently working as a Data Analyst at Sentinel Data. Passionate about transforming data into actionable insights. Strong expertise in Python, Machine Learning, Data Analysis, and ETL processes. Experienced in building interactive dashboards, developing predictive models, and automating data workflows. Seeking to join an innovative team to build intelligent, data-driven solutions.

Education

Higher Institute of Management of Tunis, Tunisia Professional Master's Degree in Data Science for Business	<i>Sep 2023 – Jun 2025</i>
Higher Institute of Management of Tunis, Tunisia Bachelor's Degree in Management Information Systems, specialization in Business Intelligence	<i>Sep 2020 – Jun 2023</i>

Experience

Data Analyst <i>Sentinel Data – Lac 1, Tunisia</i>	<i>Oct 2025 – Present</i>
- Designed, developed, and automated interactive national and regional sales and inventory dashboards for pharmaceutical laboratories, providing real-time KPI visibility and supporting strategic and operational decision-making. - Conducted predictive analytics to forecast pharmaceutical sales and optimize inventory management. - Developed an automated commercial target allocation and forecasting system by client, delegate, and region, leveraging historical sales data and predictive modeling to optimize performance tracking and improve decision making accuracy.	
Data Science / BI Intern <i>SETCAR GROUP – Zahra, Tunisia</i>	<i>Feb 2025 – Jul 2025</i>
- Built a centralized SQL database (500K+ records) and implemented automated ELT processes. - Designed interactive SAGE SEI dashboards, reducing reporting time by 40%. - Developed an LSTM predictive model in Python to forecast future salaries and deployed a rule-based HR chatbot using FastAPI, automating 85% of employee inquiries.	
Data Analysis Intern <i>Mint IT – Tunis, Tunisia</i>	<i>Feb 2023 – May 2023</i>
- Implemented a data warehouse and automated ETL processes, optimizing access to 100K+ records. - Deployed a polynomial regression model to predict remaining project time, achieving 98% accuracy. - Developed a web platform and 5 Power BI dashboards for real-time project tracking.	
Business Intelligence Intern <i>Web UP – Kef, Tunisia</i>	<i>Jun 2022 – Aug 2022</i>
- Designed and implemented a smart IoT garden solution based on Arduino. - Integrated 3 sensor types enabling data collection every 10 seconds. - Built interactive Power BI reports (20+ KPIs) with automated alerts, reducing anomaly detection time by 30%.	

Certifications

- Machine Learning Fundamentals – AWS Academy (Aug 2022) - Transformer-Based NLP Applications – NVIDIA (Sep 2024) - Power BI Simulation Certificate – PwC Switzerland (Sep 2024)
--

Projects

- Designed and developed a hybrid recommendation system combining collaborative and content-based filtering, increasing user engagement by 25%. - Developed a static web application using SQL, CSS, JavaScript, and PHP with 50+ interactive components. - Performed image classification using CNN and OpenCV, detecting anomalies with 92% accuracy.

Technical Skills

Programming & ML: Python, R, Java, C/C++, SQL, NoSQL, Hadoop, TensorFlow, PyTorch, Keras, Scikit-learn, NLTK, Transformers, Generative AI, LLMs, OpenAI API, FastAPI, Django.

Data & Visualization: MySQL, MongoDB, PostgreSQL, Hadoop, Power BI, Tableau, Talend, SSAS, SSIS, Matplotlib, Looker, Streamlit, D3.js, Sage X3, SAGE SEI, Azure Data Factory.

BI Design: Strong knowledge of dimensional modeling (Star Schema, Snowflake Schema).

Tools & Methodologies: Jira, Odoo, Agile (Scrum), BPM, Functional testing tools.

Languages

Arabic (Native) — English (Fluent) — French (Fluent)
